Subject Index

* = Abstract

A
Acromegaly and liver function 358*
Alcohol
  absorption by gastric mucosa 239
  acute lesion of gastric mucosa 239
  chronic gastric mucosal damage 239
Alcoholism
  role in gastrointestinal bleeding 129
Alphafetoprotein
  influence of partial hepatectomy and hepatic desarterialization 156
  quantitative determination in hepatoma 156
Amantadine
  prevention of reserpine induced gastric ulcer in rats 302
Amino acids
  secretion by Paneth cell in man 24
  secretion by Paneth cells in rat 13
Amino acids homeostasis in intestinal lumen 13
Antibiotics
  action on the tone of the bile duct 54
  excretion in bile 54
Antibodies
  to intrinsic factor 83
  to parietal cells 83
Autonomic nerve fibres
  afferent discharge 312

B
Barbiturates
  bile salts transport in liver 360*
  bilirubin clearance in man 351*
  tolerance in acute hepatitis 344*
Beta-glucuronidase
  in gastric juice of patients with gastric cancer 174
  in gastric juice of patients with intestinal metaplasia 174
Bile
  collection in animals 54
  excretion of antibiotics 54
Bile acid feeding and biliary lipids 360*
Bile acid metabolism in cirrhotic patients 348*
Bile acids, metabolism in man 348*
Bile composition, effect of chenodeoxycholic acid 349*
Bile flow canalicular and BSP transport in dogs 355*
Bile salt
  excretion in the liver, effect of pH 361*
  excretion in the liver, effect of phenobarbital 360*
  independant fraction of bile secretion 362*
Biliary lipids
  excretion in animals 359*
  effect of bile acid feeding 360*
Biliary tract
  cannulation in animals 54
  influence of antibiotics on the tone 54
  isolated terminal bile duct preparation 54
  perfusion with bile from other animal 54
Bilirubin clearance in man, effect of phenobarbital 351*
Bilirubin conjugates 354*
Bilirubin conjugation, quantitative estimation in rat and man 352*
Bilirubin glucuronide, extrahepatic formation in rats 353*
Bilirubin metabolism in Gilbert syndrome 352*
Bilirubin transport in animals 357*
Blood donors
  hepatitis antigen and serum gamma globulins 257

Bromosulphalein clearance, action of oral contraceptives 318
Bromosulphalein
storage in liver 339*
excretion in dogs 356*
excretion, interaction with taurocholate 356*
Tm and S, evaluation 359*
transport and canalicular bile flow in dogs 355*

C
Carbon tetrachloride
action on the rat liver 165
liver cirrhosis in rats, treatment by heparin 204
liver damage in rats 183
Celiac syndrome
amino acids efflux in small intestine lumen 24
Chenodeoxycholic acid, effect on bile composition and gallstones 349*
Cholestasis
induced by oral contraceptives 318
influence on cytochrome P 450 365*
Clearance and quantitative measure of liver function 338*
Contraceptives, oral
and enzyme induction in the liver 318
effect on liver function test 318
induction of cholestatic hepatitis 318
Cytochrome P 450 in liver 343*, 344*
in liver and heme biosynthesis 342*
in liver and porta caval shunt 345*
in liver microsome in cholestasis 365*
Cytology quantitative in liver of rats 165

D
Deoxy-glucose
stimulation of acid gastric secretion in man 44
Dopa
prevention of reserpine induced gastric ulcer in rats 302
Drug metabolism and hepatocellular uptake 340*
Drug metabolism in liver 344*
and cytochrome P 450 342*
influence of oestrogens 318
Drug metabolizing enzymes in liver 344*

E
Electrophysiology of gastrointestinal receptors
single nerve preparation 312
whole nerve preparation 312
Enzyme induction 318
Esophageal varices
role in gastrointestinal bleeding in cirrhotics 129
Ethanol
effect on hepatic mitochondria 346*
metabolism in liver 343*

F
Fatty acids in adipose tissue and fatty liver 354*
Fatty liver, acute role of fatty acids in adipose tissue 354*

G
Galactose, uptake in liver 340*, 341*
Gallstones, effect of chenodeoxycholic acid 349*
Gamma globulins
in blood donors with hepatitis antigen 257
in hepatoma with hepatitis antigen 257
in liver cirrhosis with hepatitis antigen 257
Gastrectomy
nutritional deficiency in alcoholic patient 232
Gastric cancer
and chronic gastritis 83
diagnostic value of lactate deshydrogenase and Beta-glucuronidase 174
Gastric carcinoma
screening by determination of LHD values 266
Gastric mucous secretion
contamination by salivary and pharyngeal secretions 284
stimulation by secretin in man 284

Gastric secretion
dose response curve to histamine in man 227
dose response curve to pentagastrin in man 227
in chronic gastritis 83
influence of alcohol in man and animals 239
stimulation by Deoxy-glucose and insulin in duodenal ulcer 44
Gastrin
in atrophic chronic gastritis 83
levels in Zollinger-Ellison syndrome 277
released by secretin from a malignant pancreatic adenoma 277
Gastritis
erosive gastritis
and gastrointestinal bleeding 129
in cirrhotics and non cirrhotics 129
Gastritis, acute
induced by alcohol absorption 239
Gastritis, chronic
autoimmune reactions 83
endoscopic features 83
etiology 83
gastric function 83
gastrinemia 83
histological picture 83
in gastric cancer 83
in pyloric ulcer 83
lactate deshydrogenase and Beta-glucuronidase 174
role of chronic alcoholism 239
Gastroduodenal ulcer
acid secretion in response to Deoxy-glucose in duodenal ulcer 44
duodenal ulcer, peak acid output to histamine and pentagastrin 227
Gastrointestinal hemorrhage
comparison between cirrhotics and non cirrhotics 129
role of erosive gastrics and acute ulcer 129
Gilbert syndrome in man 352*
Gluconeogenesis in the liver 350*
Gluten free diet, improvement of triparanol induced intestinal malabsorption in rats 139

H
Heme biosynthesis in liver and cytochrome P 450 342*
Heme turnover in liver, effect of phenobarbital 351*
Hemorrhage, gastrointestinal
role of alcoholism 239
Heparin
absence of protein against liver cirrhosis in rats 204
Hepatectomy
influence on serum alphafetoprotein in hepatoma 156
Hepatic blood flow, estimation by Xenon clearance 338*
Hepatitis associated antigen
and serum level of gamma-globulins 257
in blood donors 257
in hepatoma 257
in liver cirrhosis 257
Hepatitis, chronic active
xanthine oxydase in serum 183
Hepatitis, experimental, in rats 347*
Hepatitis, viral
xanthine oxydase in serum 183
quantitation of cell nuclei 366*
Hepatocellular uptake and drug metabolism 340*
Hepatocellular uptake of galactose 340*, 341*
Hepatoma
hepatitis antigen and serum gamma-globulins 257
quantitative determination of alphafetoprotein 156
Hepatoma, ultrastructural study 74
Hexosamines
in gastric juice, stimulation by secretin in man 284
Hydroxyproline
index of liver fibrosis in rats 204

I
Insulin
comparison with Deoxy-glucose effect on acid gastric secretion 44

Intestinal absorption
amino acids efflux in intestinal lumen of man 24
amino acids efflux in intestinal lumen of rat 13
homeostatic regulation of amino acids in the small intestine of the rat 1
Intestinal mucosa, atrophy in association with villous neoplasms 147
Intestinal perfusion
amino acids instillation in rat 13
and amino acids instillation in humans 24
Intestinal perfusion in the rat 1
Intrinsic factor
secretion in chronic gastritis 83
Iron deficiency
and atrophic gastritis 83

J
Jaundice, cholestatic, induced by oral contraceptives 318

K
Kallikrein-trypsin inactivator, ineffectiveness in the treatment of acute pancreatitis 220

L
Lactate dehydrogenase
in the gastric juice of patients with gastric cancer 174
in the gastric juice of patients with atrophic gastritis 174
Lactic acid dehydrogenase of gastric juice
in the screening of gastric carcinoma 266
in gastric atrophy and intestinal metaplasia 266
Liver, alcoholic damage and plasma triglycerides 350*
Liver cell fractions, stereological study 363*
Liver cell nuclei in viral hepatitis 366*
Liver cell proliferation after hepatectomy in rats 364*
Liver cirrhosis
acute gastric lesions and gastrointestinal bleeding 129
bile acid metabolism 348*
hepatitis antigen and serum gamma-globulins 257
significance of liver size 368*
xanthine oxydase in serum 183
Liver cirrhosis, experimental
induced by carbon tetrachloride in rats 204
Liver diseases
carbon tetrachloride intoxication in rats 165
liver regeneration after carbon tetrachloride in rats 165
Liver function in acromegaly 358*
Liver function, quantitative estimation by clearance 338*
Liver membranes, influence of phenobarbital 363*
Liver microsome
cytochrome P 450 in cholestasis 365*
ethanol metabolism 343*
morphometric analysis 364*
Liver mitochondria, effect of ethanol 346*
Liver neoplasm
ultrastructure of a well differentiated hepatoma 74
Liver size, clinical estimation 367*
Liver size, significance in cirrhosis 368*
Lymphatic obstruction, role in perihepatitis in dogs 196

M
Malabsorption
of glucose in rats, induced by triparanol 139
Metaplasia, intestinal
increase in Beta-glucuronidase in the gastric juice 174

N
Neoplasms
association with villous atrophy 147
Norepinephrine
prevention of reserpine induced gastric ulcer in rats 302
Nutritional deficiency after gastrectomy 232

O
Oestrogens, influence on drug metabolism in the liver 318
Oncocytes
in the human pancreas in pancreatitis 294
Ouabain excretion by the liver in rats 357*

P
Pancreatic enzymes
low level in intestine after gastrectomy 232
Pancreatitis
amino acids efflux in small intestine lumen 24
Pancreatitis, acute
ineffectiveness of anti enzyme therapy 220
survival and death rates 220
Pancreatitis, chronic
presence of oncocytes in the pancreas 294
Paneth cells
amino acid secretions in intestinal lumen of rat 13
and amino acids secretion in the intestinal lumen in humans 24
Paneth cell secretion in rats 1
Peak acid output
with histamine in man 227
with pentagastrin in man 227
Perihepatitis encapsulans
experimental reproduction in dogs 196
Pernicious anemia
and chronic atrophic gastritis 83
gastrinemia 83
Phalloidin hepatitis in mice 366*
Phalloidine hepatitis in rats 347*
Phenobarbital effect on cytoplasmic membranes of hepatocytes 363*
Phenylbutazone
induction of gastric ulcer in rats 302
Pilocarpine, effect on Paneth cell secretion in rats 1
Plasma triglycerides metabolism in alcoholic liver disease 350*
Polycythemia
experimental induction of gastric ulcer in rats 212
increase in gastric acid secretion in rats 212
Porta caval shunt and hepatic cytochrome P 450 345*
Portal hypertension
role in bleeding from gastric acute lesions 129
Protein synthesis in the liver 346*

R
Rats 165
amino acids homeostasis in small intestine 13
carbon tetrachloride induced liver cirrhosis 204
experimental intestinal malabsorption 139
Receptors, gastrointestinal, and regulation of motor and secretory responses 312
Reserpine
depletion of catecholamines and experimental gastric ulcers 302
induction of gastric ulcers in rats 302

S
Secretin
influence in gastric mucous secretions in man 284
stimulation of gastric release by a malignant pancreatic adenoma 277
Spleen size, clinical estimation 367*
Sulfates esters
in gastric juice in man 284
Suprahepatic veins obstruction, role in perihepatitis in dogs 196

T
Taurocholate and BSP excretion 356*
Triparanol induced intestinal malabsorption in rats 139

U
Ulcer, gastroduodenal
and chronic gastritis 83
role of alcoholism in bleeding 239
Ulcer, gastroduodenal experimental
induced by polycythemia in rats 212
induced by reserpine in rats 302

V
Vagotomy
prevention of polycythemia induced gastric ulcers in rats 212
Villous atrophy in patients with various neoplasms 147

X
Xanthine oxydase in serum
in acute liver damage 183
in carbon tetrachloride liver damage in rats 183
in viral hepatitis 183
Xenon clearance and hepatic blood flow 338*

Z
Zinc, radioactive, secretion by Paneth cells in the rat 1
Zollinger-Ellison syndrome
release of gastrin from the tumor by secretin 277
